## Course Overview

This course helps technical users succeed in the implementation of the eContent solution. Attendees will learn how to obtain rich content from various sources by creating agents and how to deploy those agents in a server environment.

The benefits of attending this course include:

- Gaining experience with the Agent Builder component
- Learning how to call agents from an Active Server Page or ODBC-compliant application

## # Days/Hrs of Delivery

This course is 2 days in length, typically held from 9-5.

## Delivery Method

Instructor-led lectures with exercises to reinforce the lecture portions of the course.

## Prerequisites

None

## Content Outline

### Day 1

- CenterStage Overview
